

Accelerated BS/MS in TSM

General Requirements for program completion:

This accelerated degree program pertains only to the concentration in Global Technology Management and the following changes in course requirements pertain only to the accelerated program that culminates in a BS and an MS/TSM with a concentration in Global Operations Management.

Original separate requirements for BS/TSM and MS/TSM

BS/TSM 121 credits

MS/TSM 30 credits

Total credits for BS/TSM and MS/TSM = 151 credits

Accelerated BS/MS TSM

BS/TSM 121 credits (115 undergrad, 6 grad)

MS/TSM 30 credits (6 of which are taken with the BS/TSM)

Credit overlap: 6 grad credits used toward BS/TSM and MS/TSM

Total credits for accelerated BS/MS in TSM = 145 credits

Specific Program Requirements

For admission to BS/MS TSM, students must

- i) apply to the program during their junior year, and
- ii) have overall GPA of 3.0 or higher, and average GPA of 3.0 or higher on courses taken in TSM.

Full-time Study Requirements for program completion

Students will be able to complete the entire accelerated BS/MS TSM program in May of their 5th year of study if they maintain full time student status.

The accelerated program reduces the number of undergraduate electives that students take from 3 to 1, and replaces the two undergraduate elective courses with the two graduate core courses, **EST 581 and EST 582**. To assure quality of the program, a minimum grade of B in the core courses will be required for acceptance of credits towards the MS/TSM.

Advantages for this BS/MS TSM are:

1. Earlier admission to MS/TSM while the student is in their third year of the BS/TSM program.
2. Taking two graduate courses to replace two elective undergraduate classes will strengthen overall BS/TSM Program
3. Shorter time to complete the MS/TSM degree
